

Polytechnics Canada's Fourth Annual Science and Tech Showcase – Nov. 27, 2009

Guidelines for Video Clips

There will be at least one large display monitor at the Showcase, positioned near the poster display area. The monitor will be for members to display video clips related to their institution's applied research capacity.

Clips do not have to be related to a specific poster presentation and could rather be a compilation of video footage of your institution's applied research activity, or a compilation of past projects.

As the video clips will be part of a compilation running on a loop as a static display, they will not be interactive and there will be no way to stop, skip, or go back through video clips.

This is not mandatory, but we encourage interested members to submit a video.

Any members who are interested in having their video featured on the loop can mail a video in DVD format to Tina who will have them compiled and looping on the display throughout the day of the Showcase. Please contact Tina to express interest and get the mailing address.

*DVDs **must** be sent to Tina Perricone for consolidation by November 13.*

If you have any questions, please contact Tina Perricone or Ken Doyle at the contact information below:
